## ***Introduction***

The Five-Year Schedule of Timber Sales (FYSTS) lists proposed timber sales on State Forest and State forest classified lands in the Fairbanks, Delta, and Kantishna Management Areas. The schedule provides a time line that identifies the sales, their estimated volumes, and their general locations. At a minimum, the Division of Forestry (DOF) must develop a schedule every two years. The schedule may be written annually if market and stand conditions warrant a more frequent change. It is designed to provide the general public, local governments, other agencies, and the timber industry a view of what DOF may be offering on State lands managed by Fairbanks-Delta Area Forestry for the next five years based on the State's fiscal year. The Five-Year Schedule provides a basis for agency and public comment and identification of issues although it is not developed as a decision document for particular timber sales. The schedule provides DOF with a guide in considering, designing, allocating state resources, and conducting timber sales. Listing a proposed sale does not mean a decision has been made to go forward with the sale but instead solicits input on sale planning and on particular concerns to be addressed in sale design.

The timber sales included in this schedule are part of a management philosophy that ensures a sustained yield of renewable forest resources and the integrated use of forest lands by a myriad of users, as guided by State statutes and regulations, the Tanana Valley State Forest Management Plan, Yukon Tanana Area Plan, and Eastern Tanana Area Plan. Sales are located across a wide area of the forest land base and vary in size, species composition and development requirements. Emergency salvage sales, market conditions, sale preparation problems, logistical constraints, funding, and other considerations may cause some proposed sales to be dropped or moved between years.

The Division of Forestry may not offer a timber sale unless it has appeared on at least one of the two Five-Year Schedules immediately preceding the sale. Sales are exempt from this requirement if they are 160 acres or less, salvage sales, or emergency sales in areas with fire, insect, or other natural threats. It is the policy of the Division of Forestry however, to include all sales on at least the Five-Year Schedule preceding the sale whenever possible unless waiting for the schedule will cause substantial losses of economic value on salvage sales, allow for the spread of damaging insects, or preclude a local economic enterprise or forest management project that is in the state's best interest. (References: AS 38.05.113, AS 38.05.117, and 11 AAC 71.010)

Reorganization in DOF's Northern Region resulted in the combining of the Fairbanks and Delta Areas. Within this document is the Five Year Schedule of Timber Sales for both Fairbanks and Delta. The schedules themselves are separated and maintain their geographic boundaries. In order to reflect the combined Fairbanks-Delta Area and synchronize the review process, they are both being presented in this document.

## ***Schedule Review Process***

The Review Draft Five-Year Schedule of Timber Sales is submitted for review and comment to the public and several agencies. Comments are requested for all sales and detailed comments for timber sales in year one and two from: Alaska Mental Health Trust Authority, University of Alaska Facilities and Land Management, Alaska Department of Fish and Game, Alaska Department of Environmental Conservation, Department of Natural Resources, Division of Parks and Outdoor Recreation, Division of Mining, Land and Water, Division of Agriculture and the general public. The comments are used to draft a Forest Land Use Plan (FLUP) for those specific timber sales (AS 38.05.112). The FLUP gives site specific information for each sale describing the location, estimated timber volume, harvest methods, reforestation plan, access, and other potential uses of the sale area. A FLUP is required for any commercial timber sale of ten acres or larger. The schedule followed by individual FLUPs and a preliminary finding that the sale is in the State's best interest is then distributed for review by the public. Public comments are considered, and revisions made to the FLUP as appropriate before a final finding is made that the sale is in the State's best interest. Sales where the FLUPs have been previously reviewed by the public and agencies are noted on the schedule.

### **COMMENTS**

Agency and Public comments are solicited during the review period. All of the comments are incorporated into the Fairbanks-Delta Area FY 2018-22 FYSTS file at the Fairbanks-Delta Area Offices. These comments will be kept on file so that they may be considered during the Forest Land Use Planning process that will be undertaken for each specific timber sale proposed in the FYSTS.

## ***Sustained Yield***

The Alaska Land Act requires that state land be managed for sustained yield, which is "the achievement and maintenance in perpetuity of a high level of annual or regular periodic output of the various renewable resources of the state land consistent with multiple use" (AS 38.04.910). In each of the years covered in this schedule, the total volume of wood proposed for harvest is far below the potential sustained harvest level determined in the Timber Inventory of State Forest Lands in the Tanana Valley (Hanson, 2013). This publication indicates that the annual sustained yield levels for the Fairbanks, Delta, and Kantishna Management areas are approximately 11,600 acres and 21,300,000 cubic feet. Thus the proposed average yearly harvest for this schedule, at 2,104.4 acres and 5,001,076 cubic feet, constitutes less than 19% of the potential sustained harvest by area and 24% by volume. Included in the acres and volume for this five year schedule is a long term proposed value added sale that is described below. Not included in the volumes are the Over-The-Counter Sales which have been previously reviewed.

### Annual Sustained Yield

Management Unit	Acres	Cubic Foot Volume
Kantishna	3,050	5,540,528
Fairbanks	4,606	8,506,488
Delta	3,948	7,265,294
<b>TOTAL</b>	<b>11,604</b>	<b>21,312,310</b>

### Annual Proposed Acres and Volume to be Sold

	Fairbanks		Delta		Fairbanks and Delta	
Fiscal Year	Acres	Cubic Ft. Volume	Acres	Cubic Ft. Volume	Acres	Cubic Ft. Volume
2018	249.0	377,800	232.3	451,673	481.3	829,473
2019	*2,874.4	*6,706,069	256.8	591,342	3,131.2	7,297,411
2020	*2,089.6	*5,181,500	297.6	1,439,463	2,387.2	6,620,963
2021	1,390.3	3,022,175	339.5	633,761	1,729.8	3,655,936

<b>5-YR-Total</b>	<b>8,675.0</b>	<b>20,527,744.0</b>	<b>1,847.5</b>	<b>4,477,638.0</b>	<b>10,522.5</b>	<b>25,005,382.0</b>

\*Includes Proposed Galena Sales

The law, AS 41.17.230, requires Division of Forestry to develop a management plan for the Tanana Valley State Forest. The management plan guides many of the Division's management actions. The FYSTS is consistent with the guidelines and direction established in the Tanana Valley State Forest (TVSF) Management Plan. Some of the sales may be for areas outside of the boundaries of the TVSF, and are proposed on State owned forest classified lands; these sales are consistent with the Yukon Tanana Area Plan (YTAP) and Eastern Tanana Area Plan. The TVSF Management Plan and the area plans are available for review at the Fairbanks Area Office.

## Transportation

Forest access roads will be constructed to meet the State of Alaska Department of Natural Resources Division of Forestry Forest Road and Bridge Standard Design, the area plans and Best Management Practices for the Alaska Forest Resources and Practices Act (AFRPA). Road construction averages about 7.5 miles a year and is divided roughly 66% winter and 33% all-season road. Individual proposed road segments constructed each year are generally less than two miles in length. Most all-season road construction is either spur or secondary road. In the first two years of the schedule, the only significant all-season road being proposed is the access road into the Hastings Fire salvage area. The other proposed road segments are primarily winter roads and shorter spur or secondary roads. Most of the harvest areas will be accessed via the existing road network. For any road construction, AFRPA standards will be set and enforced. Increased road construction may occur if the Value Added Sale is pursued.

## ***Reforestation***

The majority of the harvested areas are reforested naturally. Reforestation is completed through sale design which promotes natural seeding through seed trees, protection of existing saplings and pole timber during harvest operations, sale scarification, roller chopping where appropriate, and direct spot seeding. Spruce seedlings are planted to augment the natural regeneration on specific sites when necessary. All harvest areas rely on natural seeding to some degree. Final determination of site and sale specific regeneration requirements will be addressed in the FLUP specific to the sale area. All sale areas are examined frequently after harvest to evaluate reforestation success.

## ***Superior Pellet Fuels, LLC***

### ***Long Term Value Added Negotiated AS 38.05.123 Timber sale***

The Alaska Division of Forestry received a request from Superior Pellet Fuels, LLC to provide a Negotiated Timber Sale for Value Added Processing under Alaska Statute (AS) 38.05.123 on November 26<sup>th</sup> 2013. A Final Best Interest Finding for this sale has been issued. A draft contract has been prepared and submitted to Superior for review. This sale is designed as a five-year contract of roughly 600 acres per year. Total volume is approximately 140,000 green tons. A Forest Land Use Plan has been prepared for sale units Standard East, Mosquito Creek, Ohio Creek and Mosquito Creek #2.

## ***Galena Village Sales***

The Division of Forestry (DOF) is proposing to offer for sale approximately 2,900 acres of white spruce, birch and balsam poplar sawtimber and fuelwood to be harvested over a 25 year period from state lands within Township 8 South, Range 9 East, Kateel River Meridian, roughly 2 ½ miles northwest of Galena, Alaska. A request for timber sales has been made by the village to DOF to supply a wood chip fired boiler that is being installed in the Galena Interior Learning Academy. DOF would sell the timber either as a competitive or negotiated sale for commercial use. Land Classification Order No. NC-16-001 has been approved by the Division of Mining, Land and Water for this area, allowing for a forestry and wildlife habitat co-primary surface use.
